

100% Safe

Some air purifiers use technologies that can actually be harmful to your health or have other adverse effects, such as UV lights, ionizers, or ozone generators. The Aspen is guaranteed not to produce ozone or ionization. We use 100% safe purification methods because your health is our priority.

TECHNICAL SPECIFICATIONS

- **Filtration technology:** HEPA, activated carbon, mechanical filtration
- **Filtration Efficiency:** ≥99.97% @ 0.1µm
- **Fan speeds:** 6
- **Airflow:** 340, 250, 180, 150, 90, 50 CFM
- **CADR Pollen:** 442 CFM
- **CADR Dust:** 383 CFM
- **CADR Smoke:** 373 CFM
- **Power (per fan speed)**: 147, 64, 32, 21, 10, 4 watts
- **Efficiency Max:** 10.61 CFM/watt
- **Coverage area:** 1,500 square feet
- **Size:** 15.3" x 15.6" x 28.75"
- **Weight:** 38 lbs
- **Cord length:** 10 feet

Our units are proudly assembled in the USA in Seymour, CT using the highest quality fans from Germany.

Asthma or allergies?
Mold, pollen, dust, odors or smoke?

WHERE TO USE:

- Living room
- Office
- Bedroom
- Kitchen
- Basement
- Anywhere you want clean air!

COVERAGE AREA:

1,500 square feet

Easy to Change Filters

Filters should be changed once per year for optimal air cleaning performance. To change filters, simply unlatch the filter door and slide out the 3 air filters.

Easy to Use

Designed with simple intuitive controls, so you can spend less time messing with complicated menus, schedules, and apps and more time enjoying clean air.

The Ultimate Indoor Air Quality Solution

for the Absolute Cleanest, Healthiest Air in Your Home

ASPEN
HIGH PERFORMANCE AIR PURIFICATION

ASPEN

HIGH PERFORMANCE AIR PURIFICATION

Aspen is the highest performing air filtration system in the world. Simply put, nothing gets through it-except air. Three stage custom designed filters remove large particles like dust and pollen, gases and odors, and the tiniest of particles like smoke and viruses.

3 STAGE AIR FILTRATION

Different filters are designed to remove different pollutants from your air. Aspen's filters are custom-designed to allow maximum airflow and filtration effectiveness. The rest of the unit is designed around the filters.

Stage 1

ALLERGY FILTER

Merv 14 rated

REMOVES:

- Pollen
- Mold spores
- Pet dander
- Dust mite droppings
- Coarse dust
- Asbestos
- Fiberglass insulation
- Sneeze droppings

Stage 2

ACTIVATED CARBON FILTER

Contains 3.3 lbs of activated carbon

REMOVES:

- Gas
- Odors
- Formaldehyde
- Chemicals
- Tobacco smoke
- VOCs

Stage 3

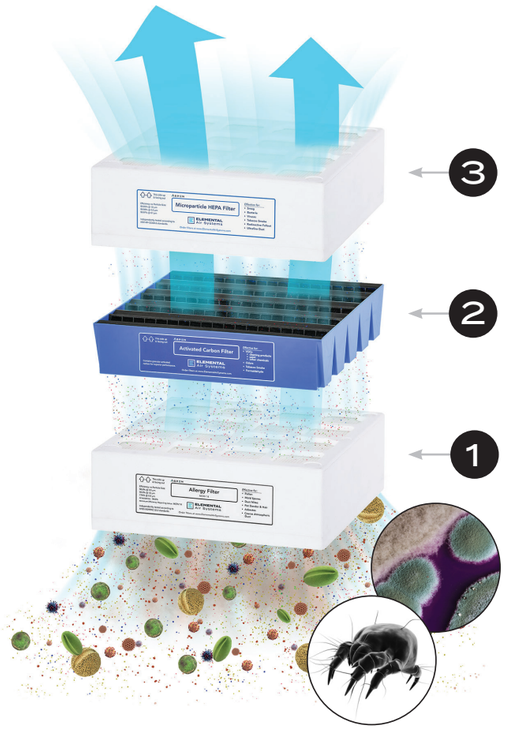

MICROPARTICLE HEPA FILTER

Removes more than 99.97% of particles down to 0.1 microns

REMOVES:

- Viruses
- Smoke/soot
- Smog
- Bacteria
- Ultrafine dust
- PM2.5

The Aspen draws air in at the bottom. Air exits out the top, goes across to the ceilings, down the walls and back to the Aspen—cleaning all the air in the space. Ducts distributing air into and out of the room means the Aspen will have **a positive impact in the entire house.**

Ultra Efficient

Aspen uses EC fan technology, which can use up to **85% less** electricity than a traditional AC fan. The efficiency gains are even more pronounced at lower fan speeds which are used most frequently.
