

100% Safe

Some air purifiers use technologies that can actually be harmful to your health or have other adverse effects, such as UV lights, ionizers, or ozone generators. Our units are guaranteed not to produce ozone, and we use 100% safe purification methods because your health is our priority.

TECHNICAL SPECIFICATIONS

- **Filtration technology:** HEPA, activated carbon, mechanical filtration
- **Filtration Efficiency:** ≥99.97% @ 0.1µm
- **Fan speeds:** 6
- **Airflow:** 340, 250, 180, 150, 90, 50 CFM
- **CADR Pollen:** 442 CFM
- **CADR Dust:** 383 CFM
- **CADR Smoke:** 373 CFM
- **Power (per fan speed)**: 147, 64, 32, 21, 10, 4 watts
- **Efficiency Max:** 10.61 CFM/watt
- **Coverage area:** 1,500 square feet
- **Size:** 15.3" x 15.6" x 28.75"
- **Weight:** 38 lbs
- **Cord length:** 10 feet

Our units are proudly assembled in the USA in Seymour, CT using the highest quality fans from Germany.

WHERE TO USE:

- Living room
- Office
- Bedroom
- Kitchen
- Basement
- Anywhere you want clean air!

COVERAGE AREA:

1,500 square feet

Easy to Change Filters

Filters should be changed once per year for optimal air cleaning performance. To change filters, simply unlatch the filter door and slide out the 3 air filters.

Easy to Use

Designed with simple intuitive controls, so you can spend less time messing with complicated menus, schedules, and apps and more time enjoying clean air.

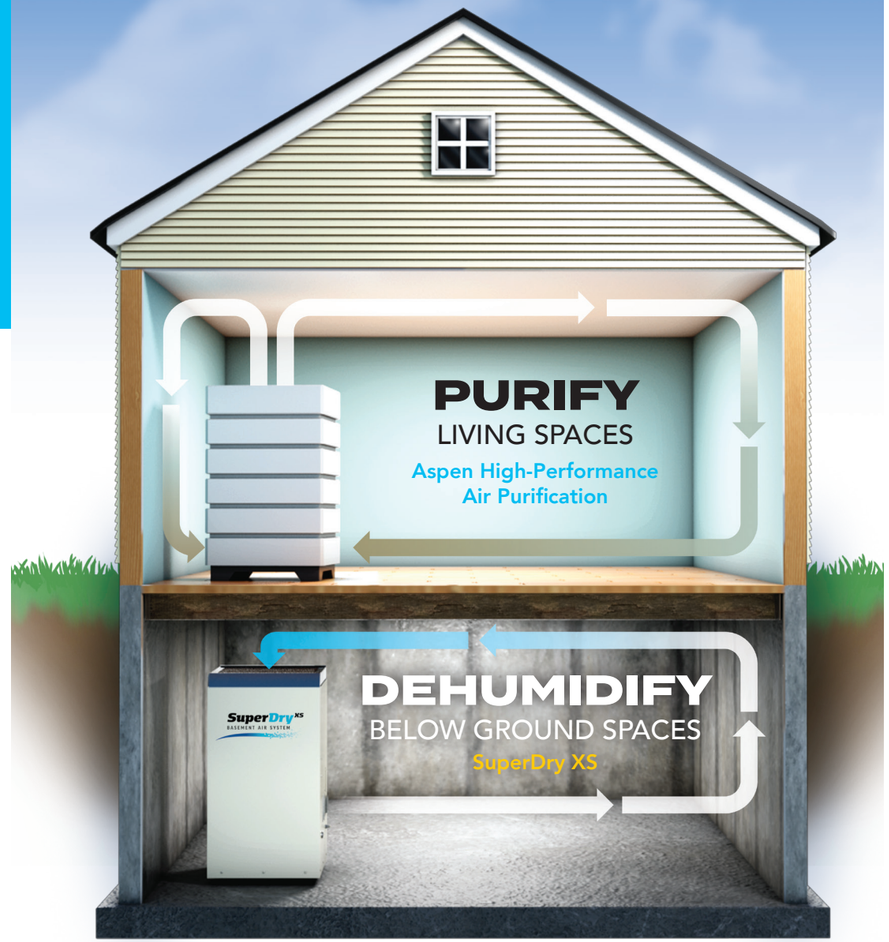

Ultra Efficient

Aspen uses EC fan technology, which can use up to 85% less electricity than a traditional AC fan at a given air flow volume. The efficiency gains are even more pronounced at lower fan speeds which are used most frequently.

PN 11153

Two High-Performance Machines Provide

THE ULTIMATE INDOOR AIR QUALITY SOLUTION

ASPEN
HIGH PERFORMANCE AIR PURIFICATION

Aspen is the highest performing air filtration system in the world. Simply put, nothing gets through it-except air. Three stage custom designed filters remove large particles like dust and pollen, gases and odors, and the tiniest of particles like smoke and viruses.

SuperDry XS
BASEMENT AIR SYSTEM

The SuperDry XS keeps the relative humidity down in all seasons with no excuses. This dries building materials and contents so mold doesn't stand a chance. Odors and that damp feeling go away! Dust mite droppings are the #1 indoor allergen. But they can't survive when the SuperDry XS is keeping the relative humidity low. The SuperDry XS is the most efficient high-performance dehumidifier in the world*, and it includes Merv 8 air filtration.

The SuperDry XS and the Aspen ...

Both of these machines are the best in the world in their class. Both were developed by Contractor Nation with over 2 years of R&D for each machine. Each has been called a "Miracle Machine" for the results they achieve in your home. But together, they provide the absolute healthiest indoor air quality available. We are indoors most of the time. If anyone in your family has asthma or allergies, or if you want the benefits of clean healthy air— the SuperDry XS and Aspen combination is the best, uncompromising way to get extraordinary results.

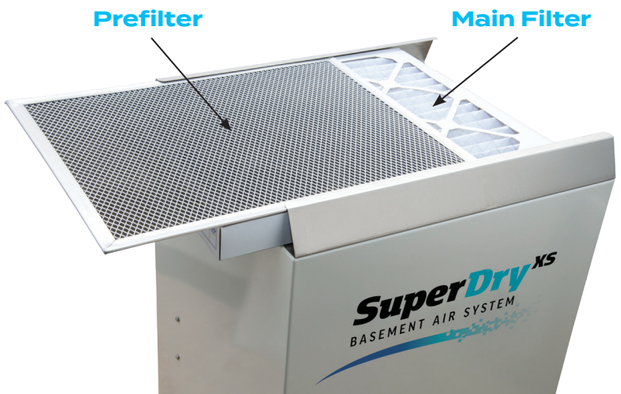

SuperDry XS™
BASEMENT AIR SYSTEM

If your basement is finished, the SuperDry XS can be located in the unfinished area and ducted to the finished area.

The first step to healthy indoor air is to keep the air dry. All below grade spaces need dehumidification, especially when the outdoor air is warmer than the indoor air (summer).

The SuperDry XS provides high-performance dehumidification, removing up to 109 pints of water per day! The SuperDry XS is designed to perform in the cooler spaces found in basements and crawl spaces. It's powerful 300 CFM blower circulates the dry air throughout to dry the contents and building materials, making any damp odors go away.

WHAT'S DOWNSTAIRS...IS UPSTAIRS!

The basement or crawlspace is part of the inside of a building as a whole. In the heating season in particular, air rises from the bottom to the top of the home. If there is high humidity and mold spores downstairs, it WILL affect the upstairs living space. By drying the basement or crawl space, the SuperDry XS will help your whole house to be drier and healthier.

Mold and mildew are musty smelling fungi that thrive in moist conditions. Dust mite fecal matter is the #1 indoor allergen. But they can't live in dry environments. The SuperDry XS will keep your home below 55% Relative Humidity— mold won't stand a chance and dust mites will die off.

** Without a big heat exchange core*

ASPEN

HIGH PERFORMANCE AIR PURIFICATION

3 STAGE AIR FILTRATION

Different filters are designed to remove different pollutants from your air. Aspen's filters are custom-designed to allow maximum airflow and filtration effectiveness. The rest of the unit is designed around the filters.

ASPEN'S FILTERS REMOVE:

- **99.99% of particles**
  down to 1.0 micron
- **99.97% of particles**
  down to 0.1 microns
- **More than 99.98%**
  of nano-particles down to 0.002 microns

Stage 1

ALLERGY FILTER

Merv 14 rated

REMOVES:

- Pollen
- Mold spores
- Pet dander
- Dust mite droppings
- Coarse dust
- Asbestos
- Fiberglass insulation
- Sneeze droplets

Stage 2

ACTIVATED CARBON FILTER

Contains 3.3 lbs of activated carbon

REMOVES:

- VOCs
- Odors
- Formaldehyde
- Chemicals
- Tobacco smoke

Stage 3

MICROPARTICLE HEPA FILTER

Removes more than 99.97% of particles down to 0.1 microns

REMOVES:

- Smoke/soot
- Smog
- Bacteria
- Viruses
- Ultrafine dust
- PM2.5

The Aspen draws air in at the bottom. Air exits out the top, goes across to the ceilings, down the walls and back to the Aspen—cleaning all the air in the space. Ducts distributing air into and out of the room means the Aspen will have a positive impact in the entire house.
